

Vaishnavi Devi

Synopsis: Cloud Data Engineer with hands-on experience across AWS and Cloudera. Built end-to-end ETL pipelines using Python, PySpark, and SQL. Currently exploring opportunities in AWS, GCP, Generative AI and Agentic AI to drive intelligent, next-generation data solutions. Delivers actionable dashboards and data insights through Power BI and other visualisation tools, while ensuring system reliability through monitoring tools like Dynatrace, SolarWinds, and AWS CloudWatch. Experienced in managing critical incidents via ServiceNow with strong domain knowledge in Banking and Insurance. Currently exploring opportunities in Generative AI and Agentic AI to drive intelligent, next-generation data solutions.

EXPERIENCE SUMMARY	Areas of Experience:
- Over 4+ years of experience in Cloud & Digital Platform Support and Managed Services - Expertise in AWS services including CloudWatch, Lambda, SNS, and Azure Logic Apps - Can build end to end pipeline using AWS and Cloudera. - Extensive expertise in performance monitoring using Dynatrace, AWS CloudWatch, and Blue Triangle - Proficient in ServiceNow for incident management and high-priority escalations - Experience in designing and implementing monitoring and alerting solutions - Strong skills in network path analysis using SolarWinds NetPath Services - Experience with infrastructure monitoring using Zabbix and Grafana - Skilled in automated report generation using Power BI and Azure Logic Apps - Strong domain knowledge in Banking and Insurance sectors - Excellent stakeholder communication and incident response capabilities	Cloudera Data Engineering tools, AWS, Prompt engineering, AWS CloudWatch management and analysis, JIRA configurations, monitoring specialist Industries: Insurance and Banking Tools: AWS,ServiceNow, Dynatrace, PowerBi, JIRA, AWS Cloudwatch, Jupyter Notebook Languages: Python, PySpark, Shell Scripting, Java Software Development Methodology : Agile

QUALIFICATION		
Degree	Institute	Year
Bachelor of Technology in Computer Science CGPA - 9.03	Karmaveer Bhaurao Patil College of Engineering, Satara, Maharashtra	2018 - 2022

CERTIFICATION		
Certification	Institute	Year
AWS Certified Cloud Practitioner (CLF-C02)	AWS	2025
Certified Python Developer	W3 school	2024
Oracle Cloud Infrastructure Foundations Associate	Oracle	2024
Oracle Cloud Infrastructure AI Foundations Associate	Oracle	2024
AI-900 (Microsoft Azure AI Fundamentals)	Microsoft	2023
AZ-900 (Microsoft Azure Fundamentals)	Microsoft	2023
ServiceNow Certified System Administrator	ServiceNow	2023
Google Digital Marketing	Google	2023
Introduction to Data Engineering	IBM (Coursera)	2022
Python Project for Data Engineering	Coursera	2022
Machine Learning	Stanford (Coursera)	2022
Deep Learning	NPTEL	2022

Working with Hexaware Technologies Ltd. From March 2022 – Till date

PROJECT EXPERIENCE

Project Name	AWS and GCP CoE, Magnati-Managed Services, Domestic & General, Credit Suisse
Environment	AWS, Cloudera Dynatrace, ServiceNow, Power BI, IRES Application, AWS CloudWatch, SNS, Lambda, BlueTriangle, Zabbix, Grafana, CloudWatch Log Insights, Azure Logic Apps, Solarwinds
Duration	March 2022 – now

Part of AWS and GCP CoE from Nov 2025 – Till date

Worked on	PoC Development for Cheque Fraud Detection on Serverless Cloudera on AWS
Environment	Cloudera and AWS
Duration	Jan 2026 to April 2026

Roles and Responsibilities

- Developed an end-to-end PoC for cheque fraud detection as part of the Cloudera for AWS Box Program, demonstrating a serverless Cloudera architecture on AWS.
- Built an automated pipeline using Python and PySpark to process cheque images, performing AI-based text extraction followed by rule-based fraud detection using Cloudera Data Engineering.
- Designed data storage using Cloudera Operational Database for cheque metadata and Cloudera Data Warehouse with partitioned Hive tables for fraud result analytics.
- Enabled real-time fraud monitoring dashboards using Impala and Cloudera Data Visualization, providing continuous visibility into suspicious cheque activity.
- Showcased the solution to Cloudera stakeholders, highlighting scalability, real-time insights, and suitability for cloud-native fraud detection workflows.

Project - Worked with Magnati – Managed Services [Banking] From Nov 2023 to Sep 2025	
Project Name	Magnati - Managed Services [Banking]
Role	Performance Monitoring Specialist
Environment	Dynatrace, ServiceNow, Power BI, Azure Logic Apps, Solarwinds, IRES Application
Duration	Nov 2023 to Sep 2025
Roles and Responsibilities	
- Responsible for comprehensive performance monitoring and incident management for banking applications. - Identifying performance bottlenecks, managing critical incidents, and ensuring seamless communication with stakeholders during system outages. - Implements automated reporting solutions to deliver critical business intelligence to clients and senior management. - Managed high-priority incidents in ServiceNow, coordinating bridge calls and stakeholder communication during outages - Automated critical business reports by triggering Power BI workflows via Azure Logic Apps - Analyzed Dynatrace dashboards for banking transactions, system shutdowns, and resource utilization (CPU, memory) to identify and escalate issues to respective teams. - Investigated network latency and connectivity problems using SolarWinds NetPath visual Diagnostic Services	

Project - Worked with Domestic & General [Insurance] from May 2022 to Nov 2023	
Project Name	Domestic & General
Role	Cloud Platform Support Engineer
Environment	AWS CloudWatch, SNS, Lambda, BlueTriangle, Zabbix, Grafana, CloudWatch Log Insights
Duration	May 2022 to Nov 2023
Roles and Responsibilities	
- Designed and implemented monitoring and alerting solutions using AWS CloudWatch to ensure system health and performance - Configured CloudWatch Alarms to trigger SNS notifications for auto-scaling and incident response - Created custom CloudWatch metrics for application-specific monitoring - Integrated CloudWatch Logs with centralized logging tools like CloudWatch Log Insights for log analysis and troubleshooting - Built dashboards in CloudWatch for real-time visualization of system health, resource utilization, and key performance indicators (KPIs) - Monitored Lambda functions using CloudWatch Metrics and Logs, including cold starts, errors, and invocation duration.	

Project - Worked with Credit Suisse[Banking] From Dec 2022– March 2023	
Project Name	Credit Suisse
Role	ServiceNow configuration assistant
Environment	ServiceNow, JIRA
Duration	Dec 2022 to Mar 2023
Roles and Responsibilities	
- Delivered stories after discussing with the BA on the most optimized solution and enhanced user experience through strategic ServiceNow configurations. - Implemented custom JIRA workflows to align with the team's Agile development process. - Created and configured ServiceNow forms, fields, and UI policies to enhance user experience and ensure data integrity.
